

■ LUGGAGE BOX OPENER KIT HONDA NC700S, NC700X

By using this kit, you can open a luggage box lid very easily.

Can be opened the lid without removing the key from the main switch key hole.

When you want to open it, just turn on the ignition key and then press the push switch.

While the ignition key is "ON", you can open it by the push switch. At the position of "OFF" or "LOCK", it cannot be opened.

Of course, it also can be opened by the key as normal function. Kit includes wire harness designed for NC700.

Therefore you can install this kit without any wire modification. Wiring is just bolt-on and coupler-on.
